

# Implications of the Pandemic on Law and Development: Climate Change

# Climate Change and COVID 19

# Climate Change and COVID 19

- Climate Change and COVID : Correlation
  - Lock Down Impact and Climate Change
- 

# COVID 19 Lessons for Climate Change

- Climate Change and COVID similarities and Lessons
- Preparedness:
- **Risk Perception: communication**
- Adaptation: Participatory democracy and decentralization: **Those countries and areas where strong means of dissemination coordination and local government better prepared.**
- Mainstreaming Climate Change into Governance Agenda
- Comparative, Regional and Socio legal Research

# COVID 19 Lessons for Climate Change

- **COVID exposes fault lines in Society :**
  - **Climate Change and Disproportionate Impact**
  - **Focus on Climate Justice: Ensuring Human Rights/ Public Participation**
- 

# Climate Change and Security

- ▶ Security Studies and responsive measures
  - ▶ Climate Authoritarianism
  - ▶ Institutional Reforms/North –South Paradigm
- 

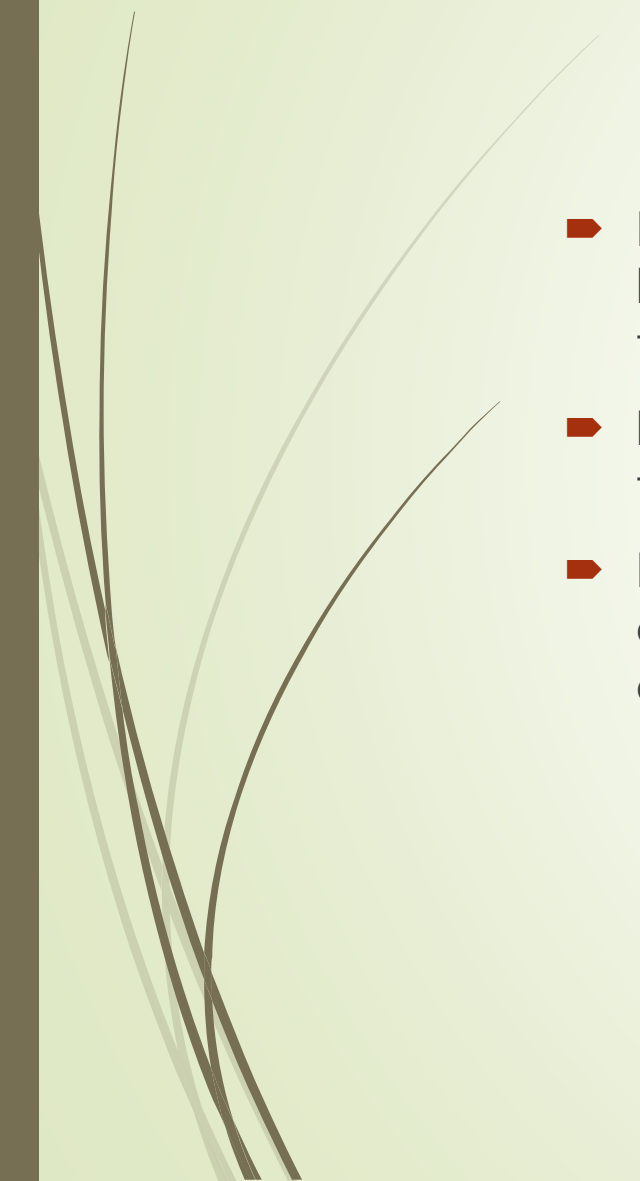

# COVID 19 and Disaster Displacement

- ▶ One-third of the world's internally displaced live in the 10 countries most at-risk to COVID-19.
- ▶ three crises rolled into one, a health crisis, a socio-economic crisis,
- ▶ Displaced populations often have precarious livelihoods, reduced or no access to social safety nets and health services. These vulnerabilities are exacerbated for those in “climate hotspots”.

# Climate change and Health

- ▶ Ensuring universal health coverage through well-resourced, equitable health systems, is essential to protect the public from both short and long-term health threats.
  - ▶ Inequality is a major barrier in ensuring health and wellbeing, especially for the most vulnerable in society
  - ▶ Ensuring access to the environmental determinants of health, such as clean air, water and sanitation, safe and nutritious food, is an essential protection against all health risks.
